EDUCATION

Bachelor's Degree

Chitkara University
2022-2026

Higher Secondary School

D.A.V Senior Secondary School
2020-2022

Certification

Databricks
Certified Data Engineer Associate
(2026)

SKILLS

- Languages:** Python, SQL
- Data Engineering:**
Databricks, ETL, Data
Pipelines, Data Modeling
- AI & ML:** Machine Learning,
Deep Learning, Generative
AI, Lang Chain, Lang
Graph, NLP
- Frameworks & Libraries:**
Streamlit, Flask, Pandas,
NumPy, TensorFlow
- Tools:** Git, GitHub, Docker,
Power BI, Jupiter
Notebook

PROFESSIONAL SUMMARY

Associate Data Engineer at R Systems International with expertise in Python, SQL, Databricks, and enterprise data engineering. Experienced in developing scalable data solutions, ETL workflows, and AI-powered applications with a strong focus on Generative AI, Machine Learning, and modern data platforms. Databricks Certified Data Engineer Associate with a proven ability to build production-ready applications, automate workflows, and deliver intelligent solutions using contemporary data engineering and AI technologies. Passionate about leveraging data and artificial intelligence to solve real-world business challenges.

WORK EXPERIENCE

Associate Data Engineer

R Systems International Ltd.

Oct 2025- Present

- Develop and support enterprise data engineering solutions using Python, SQL, and Databricks.
- Build and optimize ETL workflows, ensuring efficient data ingestion, transformation, and validation.
- Work with enterprise data lake solutions to process and manage structured datasets for analytics.
- Collaborate with cross-functional teams to deliver scalable, high-quality data solutions.
- Develop SQL queries and Python scripts to automate data processing and improve operational efficiency.
- Contribute to data quality, performance optimization, and production support for enterprise applications.

ACADEMIC PROJECTS

Finance Analytics Hub (Final Year Project)

Python | Streamlit | Pandas | Plotly | Next.js | Docker

[Click Here](#)

- Developed a web-based financial analytics platform for portfolio management, investment planning, and wealth forecasting.
- Implemented Monte Carlo simulation, SIP planning, financial health scoring, and live market analytics.
- Integrated Python-based analytics with a Next.js frontend for scalable deployment.

POC Planning Agent

Python | LangChain | LangGraph | Flask | Streamlit | ChromaDB

- Built a multi-agent Generative AI application that converts project requirements into structured Proof-of-Concept documents.
- Implemented Retrieval-Augmented Generation (RAG), workflow orchestration, and automated technical documentation generation.
